ZAS-430

The ZAS-430 system from ZON is a new, more affordable way to enjoy the audio quality and features once found in expensive custom systems. This system offers more power, an easier user interface and smarter features than any product in its class.

Based on ZON's award-winning, all-digital technology, the ZAS-430 provides whole house and in-room presets and loads of user-configurable features which can be selected directly from any controller. Like the convenience of plug and play? This system can be used right out of the box.

Pre-packaged, ready to install system combines a ZON ZR-46 Router, six ZAC-30e Controller/Amplifiers, two ZIM-4 Input Modules and a ZSR-4 System Remote, all at one affordable price.

Now There's
A ZON
For *Every* Home!
