

It takes a lot to “wow” installers. Not a problem for Z̄ON whole house audio. Just ask Alan McRae, owner of Eagle Eye Technologies. Installation? “The installation was fabulous! The architecture of Z̄ON Audio made pre-wiring as easy and simple as running telephone line.” Ease of operation? “Z̄ON Audio works right out of the box. That’s very important. We get tired of call backs for technical problems ... and from customers that don’t understand how to use their distributed audio system. This system is so user friendly. All you have to know is how to punch a button.” Customer satisfaction? “When I showed the installed product to my first customers — they looked at it and said ‘WOW!’. My clients are impressed by the good looks, the lighting and the impression that one gets when they realize that Z̄ON is a very intelligent interface ... and that it’s an attractive addition to the home decor.”

“A ‘14’ on a Scale of One to Ten. It’s That Good.”

Looks, power and a whole lot more.
